Art, whether graphic, dramatic, terpsichorean, or musical, is but the accomplishment of certain ideal graces of form or sound attained only by mechanical means through analytical preparation and application. As in nature but two fundamental forms exist (the straight line and the curve), so in voice production the mechanics of vocal sound are simple and limited. It is when we seek variety of form and expression that lines and curves must enter into combinations to convey various impressions styled emotions. Upon the ability to reproduce with pencil correct lines and curves depends the illustrative power of the graphic artist. Equally necessary is it for the vocalist to grip with unerring accuracy the fundamental mechanism which governs the human voice. English vocal systems are mainly founded upon Italian methods.
