The Effects of a Magnetic Field on Radiation -Memoirs by Faraday Kerr and Zeeman

By E. P. Lewis

Lewis Press. Hardcover. Book Condition: New. Hardcover. 136 pages. Dimensions: 8.4in. x 5.8in. x 0.6in. SCIENTIFIC MEMOIRS edited by Y J. S. AMES. Originally published in 1900. PREFACE Historical IN the early part of this century possible relationships between the various forces of nature began to attract the attention of physicists. In 1800 William Herschel discovered that a heat spectrum is superimposed on and extends beyond the visible solar spectrum, indicating some relationship between heat and light. This seems to have suggested to Domenico Morichini, of Kome, the search for a relationship between light and magnetism. In 1812 he claimed that he had been able to magnetize steel needles by exposing them to the violet radiation in the solar spectrum. Others, including Mrs. Somemlle, in England, believed that they had verified his results, but many were unable to reproduce them, and it was finally demonstrated that all these effects had been due to other causes. The dispute over this question extended over many years, and is an instructive illustration of the difficulty which even skilled experimenters may have in solving a comparatively simple experimental problem. About 1825 Sir John Herschel sent a polarized beam of light along the axis...

Reviews

The most effective ebook i possibly read. it was actually written quite completely and useful. I am just very happy to tell you that here is the best publication we have read through during my individual daily life and could be the greatest publication for possibly.

-- **Kennith Nicolas**

It is an incredible publication i actually have actually go through. I really could comprehend everything out of this composed e pdf. Its been designed in an exceedingly simple way and is particularly just following i finished reading this publication where actually changed me, alter the way i think.
