Public Health Papers and Reports Volume 16 (Paperback)

By American Public Health Association

Theclassics.Us, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1891 edition. Excerpt: . XXXIII. EXPERIMENTS ON TRAP SIPHONAGE. By Prof. J. E. DENTON, Hoboken, N. J. The experimental data presented herein represent the results of experiments which have been in progress over a period of about a year at the Stevens Institute of Technology, having for their special object the determination of the ability of the McClellan Anti-Siphon Trap Vent to protect simple S traps against the suction influence due to the downward flow of water in waste-pipes, such as are common to plumbing construction. It is believed, however, that the ground covered involves so many data regarding trap siphonage in general, that the results may be consistently presented as a contribution, to the subject, of a fairly scientific character. DESCRIPTION OF APPARATUS. 1 Two lines of waste-pipe, 68 feet in height, were erected in an elevator shaft at the Institute. One line was 4 inches...
